Weather

- — A strong westerly jet stream brings a risk of moderate or severe clear air turbulence aloft over Iberia, Italy, and Central and Eastern Europe, with the main risk area shifting east. A large band of persistent rainfall with areas of low cloud is located over Germany, Czechia, Austria, Hungary and down into the Balkans. This band moves east through the afternoon, with winds expected to increase across the Balkans and Romania. Within it, there is a localised low risk of ISOL CB (tops FL180-250) over the Adriatic and Balkans. Behind this band, low pressure drives a broad area of showers, isolated thunderstorms (ISOL CB, tops FL180-280) and fresh to strong winds across parts of W and NW Europe, particularly France, but also Belgium, Germany, N-Iberia, and the South UK & Ireland. Low pressure over the Baltic Sea brings rain to the surrounding area, with snowfall possible for Sweden and Finland.

Aerodromes

- **LIRF (Rome Fiumicino)** — Arrivals regulated due to Weather (strong wind) Moderate to high delays.
- **LGAV (Athens)** — Arrivals and departures regulated due to Aerodrome Capacity (WIP, single RWY OPS). High delays.

Airspace

- — No significant issues.
