Weather

- — A strong westerly jet stream brings a risk of moderate to severe clear-air turbulence aloft over Iberia, Italy, and C- & E-Europe, with the main risk area shifting eastwards. A broad band of heavy rainfall, low cloud and windy conditions over N- & E-Germany, Slovakia, Hungary and extending into the Balkans is moving eastwards. Behind this front, a broad area of open-cell convection is spreading from England, the Bay of Biscay and NW-Spain across France towards W-Germany and Switzerland, bringing active showers, ISOL CB (Tops FL240–280) and locally strong winds. Strong winds also affect the western coasts of Italy and the Balkans, where ISOL CB (Tops FL300–340) are possible. Low pressure over the Baltic Sea is bringing rain to surrounding areas, with snowfall possible over parts Sweden and Finland.

Aerodromes

- **LIRF (Rome Fiumicino)** — Arrivals regulated due to Weather (strong wind) Moderate to high delays.
- **LGAV (Athens)** — Arrivals and departures regulated due to Aerodrome Capacity (WIP, single RWY OPS). High delays.

Airspace

- — No significant issues.
